Passport Fee Increase

Effective April 2, 2018, the passport execution fee will increase from $25 to $35. The $10 execution fee increase applies to U.S. passport applicants using the DS-11 form including: first-time applicants over age 16, children under age 16, and applicants who reapply after reporting their previous passport lost or stolen.

Customers applying with the DS-11 form at a U.S. embassy or consulate abroad pay two separate fees: an application fee to the U.S. Department of State and the execution fee to the Passport Acceptance Facility (such as a post office in the United States or a U.S. embassy or consulate abroad). Accordingly, the total passport fee for such applicants will increase by $10 in total.

The $10 fee increase does not apply to adults eligible to renew their passport using the DS-82 form. The Department of State published a Final Rule confirming this fee change on January 31, 2018.

Glasses are no longer accepted in passport or visa photos. For more info, visit: Nonimmigrant Visa, Immigrant Visa, and Passport pages on U.S. Mission Vietnam’s website.
U.S. Citizens Eligible for E-Visa Program

In February 2017, Vietnam launched a pilot e-visa program for citizens of 40 countries, including the United States. The program uses an online application process to issue 30-day, one-entry visas for $25, payable via bank transfer. E-visa holders may enter and exit Vietnam through 28 designated international border gates, including all international airports. The program was recently extended until 2021. The Vietnamese e-visa instructions and application are available online.

Air Quality Monitors in Hanoi and Ho Chi Minh City

The U.S. Embassy and U.S. Consulate have installed air quality monitors to measure PM 2.5 particulates as an indication of the air quality. You can read more information and check the current reading for Hanoi and for Ho Chi Minh City at: https://vn.usembassy.gov/embassy-consulate/embassy/air-quality-monitor/ and https://vn.usembassy.gov/embassy-consulate/ho-chi-minh-city/air-quality-monitor/

For more details on air quality index, please follow the link to the Environmental Protection Agency’s Air Now website. The AQI can be observed either by clicking on the location on the map, or by selecting Hanoi or Ho Chi Minh City in the “Select a City” option on the upper right part of the page. The page provides AQI over the last 24 hour period as well as pollutant concentration and a downloadable historical document.

Please note that citywide analysis cannot be done with data from a single monitor. This data provides an accurate measure of the air quality in the section of each city close to the location of the monitor. The Vietnamese Ministry of Natural Resources and Environment also provides air quality data for Hanoi. You can view this information at http://www.cem.gov.vn/.

The U.S. Environmental Protection Agency (EPA) has developed a formula to convert PM 2.5 readings into an air quality index (AQI) value that can help inform health-related decisions. Meanings of AQI numerical values can be seen in the chart below. For more information on AQI and how it is calculated, please click here.
